

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS AIR FORCE COMMUNICATIONS AGENCY (AFCA)
SCOTT AIR FORCE BASE ILLINOIS

MEMORANDUM FOR AMC/LGX1

JUL 12 2002

FROM: HQ AFCA/WF
203 W Losey Street Room 2100
Scott AFB IL 62225-5222

SUBJECT: Nonapplicability of Certificate of Networkiness for G081/Citrix

1. We reviewed the documentation provided and determined G081/Citrix does not require a certificate of networkiness.
2. SAF/AQ Command, Control, Communications, Computers, and Intelligence Support Plan (C4ISP) policy memo, 25 Apr 02, requires AFCA provide a recommendation as to the networkiness of systems using AF communications and information infrastructure, and further states a certificate of networkiness is required prior to production and fielding of systems using AF communications and information infrastructure. We find G081/Citrix is a minor upgrade to the legacy G081. Since Citrix primarily contains modifications to improve overall system functionality and the changes enhance overall security, but do not impact network performance or operations, HQ AFCA determines a certificate of networkiness is not required at this time.
3. The G081 Maintenance System is operating with the understanding that it will eventually be subsumed by IMDS in the FY 04 timeframe and will migrate to GCSS-AF Integration Framework. Future modifications, expansions, or upgrades to the described implementation will require a certificate of networkiness assessment.
4. The HQ AFCA point of contact for G081/Citrix is MSgt Brian Sherman, HQ AFCA/WFSL, DSN 779-6261, e-mail afca.wfsl@scott.af.mil.

CHARLES A. PUGH, Lt Col, USAF
Director, Warfighter Capabilities and Logistics
